Program and Education Committee

The mission of the Program and Education Committee is to provide educational programs of interest to the fellows. The Committee’s focus is development of a strong educational program for the ACOEL annual meeting. The committee members work together to come up with potential program topics, vet those suggestions and then present a set of proposals to the Executive Committee for consideration. Once the programs are approved, the work turns to confirmation of speakers, development of program materials and final arrangements for presentations at the annual meeting. In addition, the Committee arranges discussions on topics of interest during the year.
